

Q-commerce System Architecture Overview

Frontend : frontend makes a request to Sanity CMS to fetch product listings and details, which are displayed dynamically on the site.

Sanity CMS: user places an order, the order details are sent to Sanity CMS via an API request, where the order is recorded.

Third Party APIs: Shipment tracking information is fetched through a Third-Party API and displayed to the user in real-time.

Payment Gateway: Processes payment and sends confirmation to the user and recorded in Sanity CMS.
